

# TUBING ADAPTER

## E Series 1/4" Tubing Adapter Sets

Walchem E-Series metering pumps with the Flexcon connections have standardized on two tubing sizes for simplicity and ease of use: the 3/8" OD for smaller pumps and 1/2" OD for the larger pumps. However, 1/4" OD tubing is still used regularly in the industry and may already be run in some replacement installations. It may also be preferred in installations where combinations of higher pressure/temperature is required of the tubing.

Walchem metering pumps can accommodate 1/4" tubing with the 1/4" OD Tubing Adapter Set. The Adapter set includes a fitting, coupling nut, PVDF JACO fitting, and an o-ring assembled together. Each set simply replaces one existing Coupling Nut / tubing fitting connection on the pump. Materials of construction match that of the pump liquid end, based on liquid end code:

### E91286

E91286-PA	ADAPTER SET, 1/4" TUBING, FLEXCON, PA
E91286-PC	ADAPTER SET, 1/4" TUBING, FLEXCON, PC
E91286-PE	ADAPTER SET, 1/4" TUBING, FLEXCON, PE
E91286-TA	ADAPTER SET, 1/4" TUBING, FLEXCON, TA
E91286-TC	ADAPTER SET, 1/4" TUBING, FLEXCON, TC
E91286-VC	ADAPTER SET, 1/4" TUBING, FLEXCON, VC
E91286-VE	ADAPTER SET, 1/4" TUBING, FLEXCON, VE/VF

NOTE: Each Adapter Set is only one pump connection

Pressure ratings of the pump dictate fitting pressure ratings. Follow tubing manufacturer's guidelines for maximum tubing pressure/temperatures.
